

Congressman Pascrell's Office Briefing – 7/23/12

Ray Basso, Chris Sebastian, Liz Butler, David Kluesner, Artie Mendel, Ben Rich

Plan is to release WRDA companion document with FFS.

Process after Proposed Plan:

- At least 60day public comment period.
- Respond to comments might take 6 months, because voluminous.
- Record of Decision.
- Approach CPG to undertake remedy under judicial consent decree (probably take 1 yr)
- If CPG doesn't choose to negotiate, then EPA considers unilateral order (probably won't be started in 2013, may be completed in 2014).
 - After unilateral order, CPG has 10 days to make good faith offer.
 - If none, then DOJ faced with compelling CPG to do work.
- Remedial design will take 2-3 yrs.

Targeted remedy: CPG talking about it informally for 2 yrs, we have urged them to send it in to prove it works. Never have.

- Can targeted remedy be tried out first, then monitor, if it doesn't work then try bank-to-bank.

By end of August, Region will make decision on preferred plan – Pascrell office would like to be briefed again.

If gets pushed back, need to keep Pascrell's office informed.
